Le Nouveau Chef. Suits you.

Dressing yourself in the kitchen is nowadays surely as important as dressing dishes. As leading brand in luxurious kitchen- and service wear, Le Nouveau Chef wants to make sure your look is as perfect as the menu you're aiming for. All ingredients must fit.

PASSIONATE

The same passion you'll find in a top chef's kitchen is also found in all our designs and products. Our mission is clear: we would like to give entrepreneurs and staff in the hotel-, restaurant- and catering industry the opportunity to excel by providing them the highest quality clothing possible.

PERSONAL

Our family-owned company, established in 1986, has grown to become one of the largest brands in the industry with customers from all over the world. Throughout the years, personal attention for our clients has been consistent and our aim is to build long lasting relationships.

FASHIONABLE

Tough cut with a great fit. Classy and comfortable. Exceptional quality with an eye for sustainability. Combining fashion with functionality, Le Nouveau Chef designs fashionable and innovative servicewear and chef jackets with a perfect fit. Suits for staff. **H**

POLO-PIQUE

The back panel (and in some cases also the sleeves) of these items are made of an innovative sustainable polo-pique fabric. This sustainable fabric contains 55% Bio-cotton and 45% Polyester derived from recycled PET bottles. The stretch in this fabric provides excellent freedom of movement.

We also created a female version of Gusto and named her **Venus**.
Check it out on page 39.

Texture:

Herringbone texture

**HERRINGBONE**

Herringbone, a weave in V-pattern, is a very dense weave and therefore exceptionally strong and durable. Due to the high thread density, this luxurious fabric fits perfectly and has a slight shine to it. Because this fabric is somewhat stiffer, it does not wrinkle quickly, so it can be seen as an easy-care product.

We care about the planet!

Le Nouveau Chef is not only known for its high-quality and innovative designs, but is also leading in creating chef- and servicewear made of sustainable fabrics.

Products made of these fabrics are labelled with a Green Choice sign. By buying one of our Green Choice products, you invest in a high-quality piece of garment which is mainly produced by respecting the natural resources of our planet.

To highlight our contribution to a sustainable world, for every sold TENCEL® product we plant a tree, in cooperation with Original Beans. Original Beans

is a certified organic chocolate brand. They combine their passion for high-quality products with sustainability by conserving endangered species in their habitat-remote rainforests.

Accompanied with your TENCEL® chef's jacket, you will find a small leaflet. The code on the leaflet enables you to find out where your tree is planted. This means when buying a chef's jacket made of TENCEL® you are not only wearing a high-quality and comfortable chef's jacket, but you are also giving something back to our planet.

These ingredients are used for our Green Choice products.

TENCEL

TENCEL® is a sustainable produced fibre made of Eucalyptus wood which is extracted from responsible managed forests with official FSC certification. The solvent used during the production of TENCEL® is almost 100% recycled. At the same time, a minimum amount of water is used during the process (compared to cotton-only 1%). For TENCEL®, there is a process developed of chlorine-free bleaching and is therefore completely biodegradable. TENCEL® received the 'European award for

Environment' from the European Union for their unique production process. Besides sustainability, the benefits of TENCEL® are particularly well-suited for chef's wear: high moisture absorption and reduced bacterial growth.

FAIRTRADE

The Fairtrade standard for textile guarantees a fair price for farmers and environmentally friendly cotton cultivation. Fairtrade products must meet strict standards to give farmers price guarantees and to

ensure good working conditions for employees. The Fairtrade programme does not only focus on fair trade, but it also has strict rules to protect environment and nature.

ORGANIC (BIO) COTTON

Organic (Bio-) Cotton is produced and certified to organic agricultural standards. The production sustains the health of soils, ecosystems and people by using natural processes rather than artificial inputs. Organic farming does not allow the

use of toxic chemicals, like pesticides, or genetically modified organisms.

RECYCLED PET POLYESTER

With this method plastic bottles, made from PET, are recycled into Polyester. This is a source of plastic that would otherwise go to landfill and would create pollution. During this process, air, water and soil will be less contaminated compared to the use of non-recycled Polyester. **H**
